CROSS

Windsurf and Wind Foil With ONE Sail

What is the Cross?

A high performance sail for windsurfing and wind foiling.

What inspired the Cross?

The need to have one sail that would work for wind foiling and windsurfing.

How does it compare to the Cheetah?

- The 5 batten Cross is lighter than the Cheetah.

- The Cross can be set full, similar to the Cheetah, for light wind power, but the Cross can also be set very flat, which is important when foiling in moderate breeze.

How does the Cross achieve high performance for both foiling and regular windsurfing?

The Cross can be rigged flat with a shallow yet defined profile for foiling OR rigged full with a deep, forward profile for freeride and bump'n'jump. The settings are easy to see with our calibrated downhaul gauge.
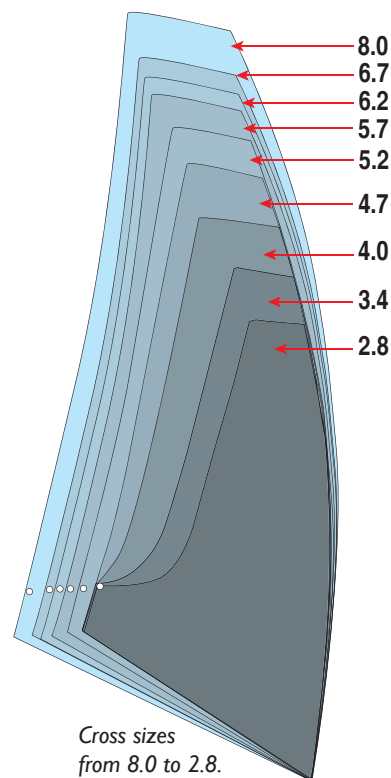

What else?

The traditional method of scaling sails results in boom lengths that are too short on the small sails. Which is why small sails under 4.0 usually have an on/off feeling.

The Cross addresses this by keeping the boom length the same for the 4.7 and smaller. This smooths out the smaller sizes and gives them excellent stability not only on the foil but also for regular windsurfing.

This eliminates the need to purchase a shorter boom for the smaller sizes.

Why buy the Cross?

The Cross works great as a stand-alone foil or windsurf sail. If you do both, the Cross will reduce the number of sails in your quiver.

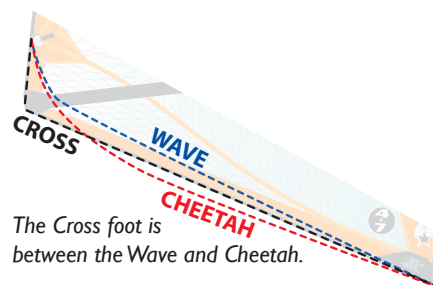

Cross sizes from 8.0 to 2.8.

The leech extends to the foot batten on the 4.7 to 8.0.

The 2.8, 3.4 and 4.0 have the same boom length and foot as the 4.7.

The Cross foot is between the Wave and Cheetah.

The Cross downhaul gauge indicates that a foiling setting generally requires more downhaul than a windsurfing setting.

| Size | Boom | | Luff | | Ezzy Mast | No. of | Weight |
m²	Min	Max	Min	Max	Base/Top	Battens	(Kg)
2.8	153	163	324	328	315 / 340	5	2.43
3.4	153	163	334	338	315 / 340	5	2.56
4.0	153	163	364	368	340 / 370	5	2.77
4.7	153	163	398	402	370 / 400	5	3.05
5.2	162	172	416	420	400 / 400	5	3.20
5.7	168	178	437	441	400 / 430	5	3.38
6.2	179	189	447	451	430 / 430	5	3.56
6.7	189	199	456	460	430 / 430	5	3.74
8.0	212	223	486	490	460 / 460	5	4.20
