

Zephyr

Back to Our Roots

The Ezzy Zephyr takes us back to a time when sailing in 10 knots or less of wind was a heck of a lot of fun. The Zephyr's long boom combined with the stable profile gives the Zephyr the power of an 8.5 and the control and feel of a 6.5.

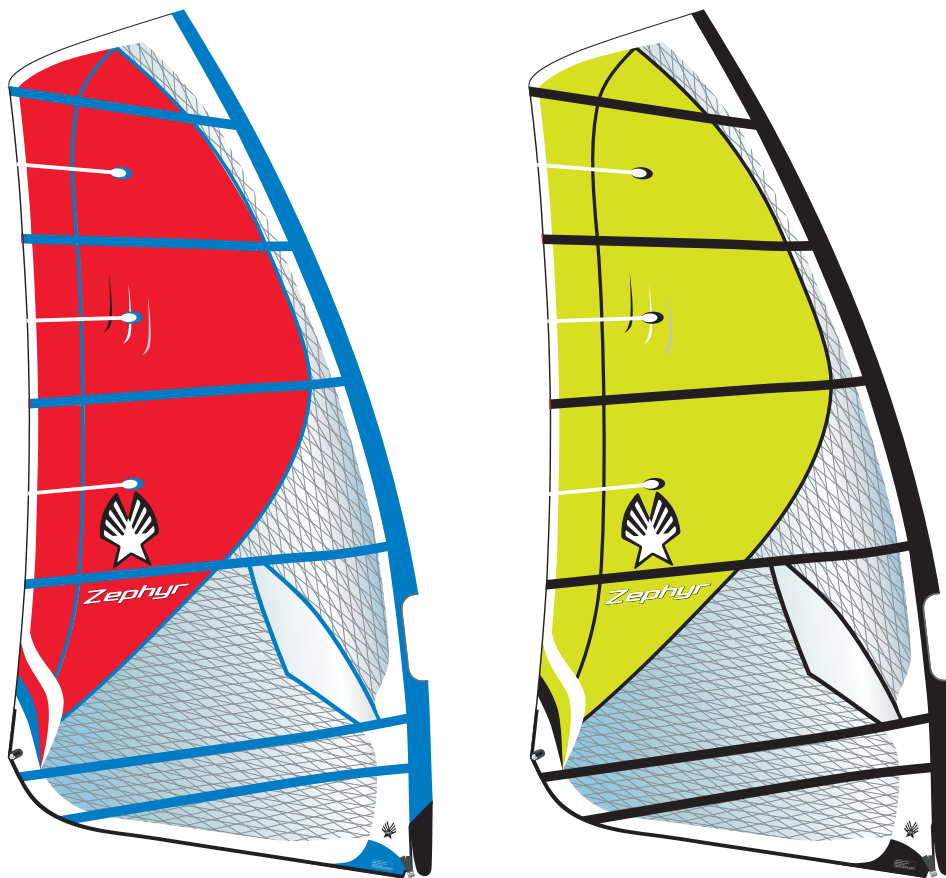

Light and easy to throw around. The Zephyr is a blast to sail on Stand-Up Paddle (SUP) boards as well as on freeride boards.

Profiled seam shaping. The Zephyr has a camber-like profile without using cams creating a draft forward and deep foil which is perfect for light wind sailing. For stronger wind, apply more outhaul to flatten the profile, and the Zephyr becomes a perfect high wind Freeride sail.

Easy to rig. Fits on any 460 mast. The Zephyr has color coded outhaul and downhaul indicators.

Built to last. The Zephyr contains no monofilm. The new Tri-Lite cloth in the center panel is lightweight and strong. The lower panels and luff panels are built with our super tough Spectra® X Film. The battens are RBS® epoxy. The Zephyr also has a vinyl window for durability and perfect visibility.

Every Zephyr is rigged and checked before it leaves the factory.

Size	Min Luff	Max Luff	Min Boom	Max Boom	Mast	No. of Battens	Sail Weight
7.5	485	489	215	226	460	6	4.67 Kg
